Addis Ababa, Ethiopia

SUMMARY

Full Stack Developer with 6+ years of experience designing and building scalable backend systems, RESTful APIs, microservices, and cloud-based applications across e-commerce, AI, SaaS, and real-time platforms. Experienced in Node.js, Express.js, NestJS, PostgreSQL, MongoDB, Docker, AWS, and system architecture. Proven ability to develop secure, high-performance backend infrastructures supporting thousands to millions of users. Strong background collaborating with cross-functional remote teams, optimizing performance, and delivering production-ready systems in Agile environments.

EXPERIENCE

EMAWAS

Jan 2025 – Present | Addis Ababa, Ethiopia

Full Stack Developer

- Designed, developed, and meticulously maintained complex mobile features for a high-traffic e-commerce platform, ensuring a seamless, intuitive user experience with consistently fast and responsive performance across both Android and iOS devices.
- Architected and implemented scalable product browsing systems, advanced multi-layered filtering mechanisms, and comprehensive end-to-end order management workflows, significantly enhancing user engagement, satisfaction, and conversion rates.
- Collaborated closely with backend engineers, product managers, and UX designers within Agile sprint cycles, delivering production-ready, high-quality features on schedule while consistently adhering to industry best practices for maintainable, clean, and efficient code.

BOINGO AI

Apr 2025 – Aug 2025 | Mexico

Senior Frontend Developer

- Spearheaded the development of core frontend features for a sophisticated AI-powered real estate platform hosting over **44,000 property listings**, ensuring a smooth, visually appealing, and responsive interface for users across devices.
- Engineered responsive, **high-performance UI components to facilitate efficient property discovery**, seamless listing management, and improved navigation, directly enhancing the user journey and platform usability.
- Collaborated with **AI and backend teams to implement intelligent listing validation systems**, dramatically improving data accuracy, search relevance, and overall user experience on the platform.

BRAINBITE

Apr 2024 – Mar 2025 | Netherlands

Full Stack Developer

- Built and scaled AI-powered personalized learning features for an edtech platform with **1K-2K+ total users and ~800-1,200 monthly active users**, achieving 100%+ MoM growth in traffic and adoption.
- Developed fullstack systems for **1:1 conversational AI tutoring and 50+ AI mentor personas**, improving student engagement by **~30-40% and reducing drop-off** through real-time adaptive learning.
- Engineered scalable SaaS architecture for a fast-growing AI edtech startup (**50+ team members across 4 continents**), improving performance by **~40% and enabling seamless delivery** of personalized multi-subject learning.

Feb 2024 – Dec 2024 | Ethiopia & UAE

SELAM SOFTWARE / YBS

Senior Frontend Developer

- Led frontend development for a large-scale e-commerce **platform serving over 1 million users**, delivering impactful improvements that significantly increased system performance, usability, and **user retention by 40%**.
- Designed and implemented real-time interactive features for a proximity-based advertising platform, boosting user **engagement by 30% and providing a dynamic**, personalized experience.
- Optimized the end-to-end checkout workflow, reducing friction, minimizing cart abandonment, and significantly increasing completed transactions, directly driving revenue growth.
- Actively participated in **Agile teams, including sprint planning, code reviews, and cross-team collaboration**, ensuring high-quality feature delivery aligned with business objectives.

PLUTO TECHNOLOGIES

Jul 2022 – Mar 2025 | Addis Ababa, Ethiopia

Lead Full Stack Developer

- Led development of **10+ web and mobile platforms across e-commerce**, SaaS, and event systems.
- Designed and implemented scalable architectures using **React, Node.js, and cloud services**.
- Delivered 5+ production platforms within one year, **increasing client engagement by 30%**.
- Built systems integrating **payment gateways (Chapa, Telebirr)**, QR-based workflows, and real-time features.
- Mentored developers and led technical decision-making across projects.

PROJECTS

BrainBite – AI-Powered Learning Platform (Web)

- Contributed to a fullstack AI-driven edtech platform with 1K-2K+ total users and 800-1,200 monthly active users, building scalable features for personalized learning and interactive, gamified experiences.
- Integrated AI-powered personalization and 1:1 conversational tutoring systems (50+ AI mentor personas), improving engagement by 30-40% while optimizing performance across dynamic, data-driven learning flows.

Boingo AI – Real Estate Platform (Web & Mobile)

- Contributed to both web and React Native mobile applications for an AI-powered real estate platform with 44K+ listings, building scalable UI components and advanced property discovery features.
- Integrated frontend systems with AI-driven data processing to ensure accurate, duplicate-free listings while optimizing performance across large datasets.

Emawas – E-commerce Platform (Web & Mobile)

- Developed and maintained full-stack features across web and mobile platforms, including product browsing, filtering, order management, and admin systems for a high-traffic marketplace.
- Optimized performance and API integration to support large product catalogs and seamless real-time user interactions.

ETH Delivery – E-commerce & Delivery Platform (Web & Mobile)

- Built and scaled web and React Native mobile applications with real-time delivery tracking, secure payment integration, and high-performance user flows for a large user base.
- Implemented WebSocket-based live tracking and optimized checkout experience to improve reliability, speed, and user conversion.

Smart Beacon Ads – Proximity-Based Advertising System

- Developed web and mobile interfaces for a real-time, location-based advertising platform using beacon technology and push notification systems.
- Enabled targeted, context-aware campaigns with scalable architecture, improving engagement and conversion rates.

EDUCATION

Master of Software Engineering (Fast Track)

Addis Ababa Science and Technology University – 2024 – 2026

GPA: 3.75 / 4.0

Bachelor of Science in Software Engineering

Addis Ababa Science and Technology University – 2018 – 2022

GPA: 3.67 / 4.0

SKILLS

Languages: JavaScript (ES6+), TypeScript, Python, SQL

Mobile: React Native, Expo, iOS & Android Development, Native Modules Integration, Performance Optimization, Offline Support, (App Store & Google Play)

Frontend: React, Next.js (App Router), Redux Toolkit, Context API, Tailwind CSS, Material UI, Responsive Design, Component-Based Architecture

Backend: Node.js, Express.js, NestJS, REST API Development, GraphQL, Authentication (JWT, OAuth), API Security

Databases: PostgreSQL, MongoDB, MySQL, Supabase, Firebase (Firestore, Realtime DB), Prisma, Mongoose, TypeORM

APIs & Realtime: REST, GraphQL, WebSocket, Firebase Realtime Services, Push Notifications, Third-Party API Integration, Payment Integration (Chapa, Telebirr)

Cloud & DevOps: AWS (EC2, S3, Lambda), Docker, CI/CD (GitHub Actions, GitLab CI), Deployment, Environment Configuration, Monitoring

Tools: Git (GitHub, GitLab), Postman, Insomnia, Figma, Jira, Trello, VS Code, Chrome DevTools

Practices: Agile (Scrum, Kanban), Sprint Planning, Code Reviews, Clean Code, System Design, Scalable Architecture, Version Control Workflows
